Tiruchirappalli, Tamil Nadu, India

Professional Summary

Motivated undergraduate engineering student with strong interests in **AI tools for digital marketing, data analysis**, and **IoT-based systems**. Passionate about leveraging technology to solve real-world problems in business, automation, and smart systems. Strong communicator with public speaking experience and a growing foundation in analytics and embedded technologies.

Key Skills

- Financial Analysis, Business Analysis, Data Analysis
- AI Tools for Digital Marketing, Automation Tools
- Front-End Development
- Public Speaking, Communication, Presentation Skills

Technical Tools

- **Programming:** Python, C
- **IoT & Embedded:** ARM, STM32, Sensors, Microcontrollers
- **Cloud:** Microsoft Azure
- **Industrial Tools:** Delta PLC
- **Software:** MS Excel, MS Word, Tally

Projects

Fitness App (Workout Guide Platform)

GitHub Link

- Developed a fitness support application for gym users providing structured workout tutorials.
- Built using **TypeScript** with focus on usability and guided fitness learning.

Namma Unavu – Food Delivery Platform

GitHub Link

- Designed a food delivery platform connecting users with local food providers.
- Improved digital ordering experience through structured application flow and usability.

Food Ordering App

Private Repository

- Built a food ordering system allowing users to browse menus and place orders digitally.
- Implemented core ordering workflow and interface design.

Donation Tracker using Python

- Developed a Python-based application to track donations, donors, and fund utilization.
- Implemented data recording, reporting, and basic analytics for transparency.

IoT-Based Wind Energy Production and Monitoring System

- Designed an IoT system to monitor wind energy generation parameters in real time.
- Integrated sensors and microcontrollers to track voltage, speed, and power output.
- Enabled remote monitoring for efficient renewable energy management.

IoT-Based Fire Fighting Robot

- Developed an autonomous robot capable of detecting and extinguishing fire using sensors.
- Integrated microcontroller-based control system for movement and flame detection.
- Designed to improve safety in hazardous environments using IoT-enabled monitoring.

Experience & Training

AI Tools for Digital Marketing (Self-Driven Learning)

- Explored AI-based tools to improve digital marketing performance and automation.
- Applied data analysis concepts to evaluate customer engagement and campaigns.

Implant Training — TANGEDCO

- Gained practical exposure to electrical systems and industrial power operations.
- Observed maintenance and functioning of power distribution systems.

Certifications

- NPTEL — Cloud Computing
- NPTEL — Python for Data Science
- Microsoft Azure Fundamentals
- Create Social Media Content with Prezi — Coursera
- Introduction to ARM and STM32 Microcontrollers

Workshops

- Industrial Automation — SARA Controls & Automation
- IoT, Machine Learning, and AI for Smart Crop Protection — Anna University (BIT Campus)
- Workshop on IoT — KPR College of Engineering
- IoT, Drones, and Robotics — Village School of Technology

Languages

- Tamil — Fluent
- English — Advanced
- German — Beginner
- Hindi — Intermediate

Interests

Artificial Intelligence Applications, Renewable Energy Systems, Financial Awareness, Business Strategy, Personal Branding

Education

B.E. in Electrical, Electronics and Communication Engineering K. Ramakrishnan College of Engineering CGPA: 8.0	2023 – 2027
Higher Secondary Education (Mathematics & Computer Science) Raj Vidya Bhavan Score: 90%	2021 – 2023
Bachelor's Degree in Hindi Language and Literature Dakshina Bharat Hindi Prachar Sabha	2014 – 2018
